🪪 Summary:

Full Stack Developer with 3.5 + years of experience in front-end (React) and back-end (Node.js, Express.js) development. Proficient in MySQL, PostgreSQL, and MongoDB. Skilled in RESTful APIs, GraphQL, authentication (JWT, OAuth), cloud deployment (AWS, Azure, GCP), Git, and testing frameworks to build secure, scalable, and high-performing applications.

🎓 Education:

B.Tech (Computer Sciences and Engineering)
LDC institute of Technical Studies
2022 – 2025 | Prayagraj U.P
- Developed a Flipkart-like e-commerce platform as a Full Stack Developer for my final year project in CSE.
- Designed and implemented the front-end and back-end using React.js, Node.js, and MongoDB.
- Ensured a responsive user interface and efficient data management for a seamless shopping experience

Mechanical Engineering Production
Government Polytechnic Sumerpur
2018 – 2021 | Hamirpur, U.P
- Designed and produced a drone, focusing on mechanical engineering principles and production techniques to ensure optimal performance and stability.

🧠 Skills:

Languages :
React.js, React Native, Redux, Node.js, Express.js, Tailwind CSS, Bootstrap, JavaScript,

API Testing & Authentication:
RESTful API, JWT Authentication, OAuth, Postman, Insomnia

Version Control :
Git, GitHub

Soft Skills:
Problem-Solving Skill, Communication, Team Collaboration, Adaptability, Time Management, Attention to Detail, Creative Thinking

Database :
MongoDb, MySQL, Supabase, Firebase,

💼 Professional Summary:

Full-Stack Developer
Ayansh Tech Solution Pvt Ltd.
2022 – Current | Noida, Up
- Built responsive UIs with **React.js, HTML5, CSS3, and JavaScript**, enhancing performance and usability.
- Developed scalable back-end applications with **Node.js, Express.js**, and **RESTful APIs**.
- Managed **MySQL, PostgreSQL, and MongoDB** databases, ensuring optimized queries and data integrity.
- Implemented **authentication (JWT, OAuth)**, real-time features (**Socket.IO** ↗), and testing (**Jest, Mocha, Selenium**).
- Deployed and optimized applications on **AWS, Azure, GCP, and Firebase** with Git-based version control.

📂 Projects

Life Navigator
- Built and deployed REST APIs, automated workflows using n8n with Google Calendar sync, and created an AI voice assistant using HeyGen and OpenAI. Developed responsive UIs with React, Redux, and Material-UI. Stack: React, Redux, MUI, REST API, n8n, HeyGen, OpenAI, Google Calendar.

Cleint Panel
- Worked on a client panel built with React.
- Implemented Redux for efficient state management.
- Integrated APIs for smooth data flow.
- Enhanced overall functionality and user experience.

Dialer
- Developed a dialer calling system for efficient client communication.
- Built both frontend and backend components for smooth call handling.
- Integrated APIs and logic to manage call flows and client interactions.
- Ensured reliable performance and seamless user experience across the system.

Dj Rental
- Worked on a DJ rental eCommerce website.
- Developed the frontend using React.
- Built and integrated backend APIs with Node.js.
- Ensured a smooth and user-friendly experience.
